### 05 注意事项

- 每次上电会自动检测输入的油门信号,然后执行相应的油门模式;
- 首次使用无刷电调或更换遥控设备后需要进行油门行程校准; Dshot 模式时,将不再需要校准油门;
- 请勿刷写除“Flycolor\_X\_Cross\_BL\_32”以外的固件以免损坏电调;
- 无论任何时候都要注意极性,供电之前一定要反复检查;
- 在插拔或者做任何连接时,请关闭电源;
- 请不要超出ESC工作电流范围使用;
- 所有焊接要求良好的焊接技术,任何时候都需要避免因焊接而造成元件或线材之间短路;
- VBAT 为电池电压,如果连接至其它设备,务必确认工作电压是否匹配;
- Cu.(Current)为电流检测口,可连接至飞控对应电流检测口;
- 可以做一些减震措施尽量避免震动;

## BL-32 4in1 ESC

Thank you for using our product. Any improper operation may cause personal injury damage to the product and related equipments. This high power system for RC model can be dangerous, we strongly recommend reading the user manual carefully and completely. We will not assume any responsibility for any losses caused by unauthorized modifications to our product. We have the right to change the design, appearance, performance and usage requirements of the product without notice.

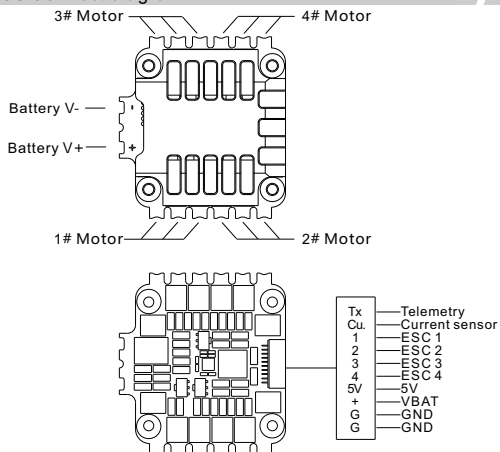

### 01 Main features

- ARM 32-bit Cortex MCU, frequency up to 48 MHZ.
- BLHeli\_32 firmware, which is designed for superior functionality and performance.
- 4in1 ESC built-in current sensor, 5V/3A BEC, VBAT output.
- Large area aluminum heat sink can effectively slow down the temperature rise
- Supports regular 1-2ms pulse width input, as well as Oneshot125 (125-250us), Oneshot42 (41.7-83.3us) and Multishot (5- 25us). The input signal is automatically detected by the ESC upon power up.
- Dshot signal is supported at any rate up to at least Dshot1200.
- Damped light does regenerative braking, causing very fast motor retardation, and inherently also does active freewheeling.
- Supports higher power load, more suitable for violent flight of racing drone.

### 05 Attention

- ESC will automatically detect the input throttle signals every time as soon as it powered on, and then execute the corresponding signal-receiving mode.
- User need to calibrate the throttle range when starting to use a new ESC or another transmitter. When the input signal is Dshot, throttle calibration is disabled.
- Please don't flash any other firmware except "Flycolor\_X\_Cross\_BL\_32".
- Observe polarity at all times. Check and double check before applying power.
- Power off before unplugging, plugging in or making any connections.
- Please do not exceed the current range.
- All welding requires good welding technology, short circuit between the element or the wire should be avoided at any time.
- VBAT is battery output, make sure your device operating voltage is matched if you want to use VBAT.
- Cu.(Current)port can be connect to the port on F.C for current meter.
- Do everything you can to prevent vibrations.
- Please contact Flycolor sales or technical support for more information.
